

Things to be done before attending the AWS Cloud Native Development training

Note:

1. You will not be able to install the AWS CLI on your office Laptop. Use your personal laptop for coding purposes.

2. Decide in which language you will code.

Downloading and Installing the AWS CLI

Download and Install the AWS CLI from the following link

For Windows: <https://awscli.amazonaws.com/AWSCLIV2.msi>

For MAC: <https://awscli.amazonaws.com/AWSCLIV2.pkg>

Downloading and Installing AWS SDK

Python:

To code in Python, you will require the Boto3 toolkit.

Install Boto3 toolkit using `'pip install boto3'`. (It is assume you already have Python installed.

Java

If you are using **IntelliJ**, follow the link and install the toolkit

<https://aws.amazon.com/intellij/>

If you are using **Eclipse**, follow the link and install the toolkit

<https://docs.aws.amazon.com/toolkit-for-eclipse/v1/user-guide/setup-install.html>

If you are using **Visual Studio Code** install the toolkit by following the link

<https://docs.aws.amazon.com/toolkit-for-vscode/latest/userguide/setup-toolkit.html>
